EXPERIENCE IN AUTOMATION TECHNOLOGY SINCE 1956

DEVELOPMENT

One of the main focuses of the Papenmeier Electronics Division is the development of customised, complex assemblies. Innovative high-tech designs are created in close cooperation with our customers – products that optimally meet all the desired specifications and enable a cost-effective production process.

PRODUCTION

Papenmeier produces in small to medium-sized batches. From unique item and mini-series to medium-sized batch quantities, we are your reliable partner. Flexible workflows and a high level of process management complement each other at our facilities.

TESTING AND INSPECTION

Conscientious compliance with the testing steps combined with the experience of our staff warrant the quality of the product.

- Conclusion of various approval procedures: TÜV, CE, UL, GS
- Artificial ageing of modules
- Optical inspection, functional testing
